UHF CB RADIO

XRS™ Connect - Bluetooth Enabled

Enabled by Bluetooth® wireless technology, XRS™ offers the first ever app designed for UHF CB Radio and introduces new features such as; creating and sharing scan lists and instant access to the entire Australian and New Zealand registered analogue frequency database.

PRODUCT FEATURES

Comes with mounting cradle and microphone bracket

29mm (height) x 128mm (width) x 117mm (depth)

- End user software upgradeable via the dedicated XRS™ Connect App*, available on Google Play or the App Store.
- Instant access to over 20,000 receive frequencies.
- The XRS™ microphone has two customisable buttons which can be assigned most radio functions.
- Diecast chassis metal construction.
- Speaker microphone is designed for noisy environments and houses a 2 watt speaker for clearer and more robust sound.
- Equipped with ScanSuite for virtual private group communications. With super-fast scan, this CB radio can now scan 25% faster than previous generations and up to 4x faster than competitor radios‡.
- Create any combination of up to 400 frequencies in 8 scan lists (zones), including frequencies anywhere between 403–520 MHz and store them in your app for simple, easy access. The lists can then be shared with any other XRS Connect radio user.
- The microphone has been tested to over 1,000,000 PTT cycles. The professional grade strain relief and OLED screen make this microphone as durable as they come.
- Professionally installed by a trained technician.
- Comes with a 3 year nationwide warranty† + 1 additional year for downloading and registering App.
