

SAFETY SYSTEMS

PRECISION PARKING FOR THE COMPROMISING MOMENTS

Front Parking Sensors

GREAT COVERAGE

Up to 4 sensors provides comprehensive coverage*

HAZARD DETECTION

Audible alerts allow greater awareness of potential hazards

DISCREET DESIGN

Colour coded sensor heads to match vehicle paintwork†

For increased confidence when precision parking.

FRONT PARKING SENSORS

Experience easier and safer parking with the assistance of front parking sensors. These ultrasonic sensors monitor the distance from your vehicle to potential obstacles. Front parking sensors leave the stress out of parking and boost confidence when manoeuvring in tight situations.

PRODUCT FEATURES

Zone 1 - Distance 0.8m

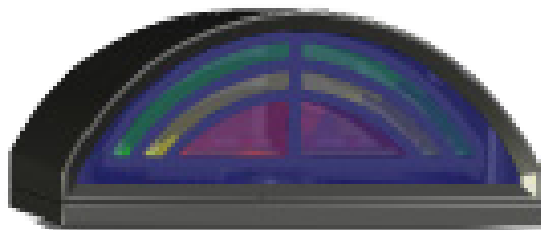

Zone 2 - Distance 0.4m

Visual aid device on dashboard:

Yellow warning lights - Distance 0.8m fast beeping

Red warning lights - Distance 0.4m constant beeping

- Up to 4 sensors measure 2 zones, where the sensors can detect obstructions up to 0.8m away.
- The system automatically reduces unwanted detection by going mute (silent) whenever the detection area is unchanged for more than four seconds. As soon as anything in the detection area (either the vehicle or the detected object) moves, the system becomes active again.
- Sensor heads colour coded to match vehicle paintwork[†].
- Electronically scans the area ahead of your vehicle during parking manoeuvres and audibly alerts you to objects within close proximity.
- Can provide corner protection for narrow lanes, tight parking space or garages.
- Professionally installed by a trained technician.
- Comes with a 3 year warranty[‡].

Ask us about a rear parking sensor kit also!
