Reverse Camera Mirror

AUTOMATIC

Appears when car is
put into reverse gear

HIGH QUALITY MONITOR

Provides excellent
picture clarity

DISCREET DESIGN

Slim camera designed to
match modern vehicles

For increased clarity, confidence and peace of mind when reversing.

REVERSE CAMERA MIRROR

This rear view mirror is designed to show real-time video behind your car. The rear view system automatically starts and displays the video feed when your car is put into reverse. The monitor then automatically switches off when your car is changed out of reverse and the mirror functions like normal with the monitor becoming invisible.

PRODUCT FEATURES

TFT-LCD Display Screen
