Uses your original vehicle key
to arm and disarm your vehicle
security system

ALL ROUND PROTECTION

Security protection for your
whole vehicle including
doors, boot and bonnet

An advanced security solution, designed for extra peace of mind.

CANBUS UPGRADE ALARM

If your vehicle has a factory fitted locking system, you can convert it into a full alarm system with our CANBUS Upgrade Alarm. Feel even more confident that your car and belongings are secure, wherever you're parked.

PRODUCT FEATURES

Comprehensive coverage

Option extra sensors for specific applications.

- Extra immobilisation circuit.
- Glass-break sensor.
- Offers security protection for all doors, plus boot and bonnet*.
- Features a unique sounding digital battery back-up siren, that stops only with a unique override pin code.
- Programmable alarm on/off tones: The siren features soft arm/disarm chirps or can be set to silent arm mode.
- Visual arm/disarm with a dash mounted LED.
- Designed to be subtle with your vehicle's original factory key.
- Fully compatible with modern Controller-Area Network (CAN-BUS) technology found in modern vehicles.
- Provides the opportunity for a quick and easy alarm upgrade to the vehicle's existing security.
- Supports double lock pulse deadlocking (on selected vehicles only).
- Optional extras available: ultrasonic, microwave, tilt and shock sensors, and pin switches.
- Professionally installed by trained technicians.
- Comes with a 3 year nationwide warranty*.
